

Pupils should be taught to:

	Key Stage 1		Lower Key Stage 2		Upper Key Stage 2	
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Working scientifically (Yr 1&2, 3&4, 5&6)	Living things and their habitats (Yr 2, 4, 5, 6)		Animals, including humans (Yr 1-6)		Light (Yr 3,6)	
asking simple questions and recognising that they can be answered in different ways	explore and compare the differences between things that are living, dead, and things that have never been alive		identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals		recognise that they need light in order to see things and that dark is the absence of light	
observing closely, using simple equipment	identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other		identify and name a variety of common animals that are carnivores, herbivores and omnivores		notice that light is reflected from surfaces	
performing simple tests	identify and name a variety of plants and animals in their habitats, including micro-habitats		describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets)		recognise that shadows are formed when the light from a light source is blocked by a solid object	
identifying and classifying	describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food		identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense		find patterns in the way that the size of shadows change	
using their observations and ideas to suggest answers to questions	recognise that living things can be grouped in a variety of ways		notice that animals, including humans, have offspring which grow into adults		recognise that light appears to travel in straight lines	
gathering and recording data to help in answering questions	explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment		find out about and describe the basic needs of animals, including humans, for survival (water, food and air)		use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye	
asking relevant questions and using different types of scientific enquiries to answer them	recognise that environments can change and that this can sometimes pose dangers to living things		describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene		explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes	
setting up simple practical enquiries, comparative and fair tests	describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird		identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat		use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them	
making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers	describe the life process of reproduction in some plants and animals		identify that humans and some other animals have skeletons and muscles for support, protection and movement		Sound (Yr 4)	
gathering, recording, classifying and presenting data in a variety of ways to help in answering questions	describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals		describe the simple functions of the basic parts of the digestive system in humans		identify how sounds are made, associating some of them with something vibrating	
recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables	give reasons for classifying plants and animals based on specific characteristics		identify the different types of teeth in humans and their simple functions		recognise that vibrations from sounds travel through a medium to the ear	
reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions	Plants (Yr 1, 2, 3)		construct and interpret a variety of food chains, identifying producers, predators and prey		find patterns between the pitch of a sound and features of the object that produced it	
using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions	identify and name a variety of common wild and garden plants, including deciduous and evergreen trees		describe the changes as humans develop to old age		find patterns between the volume of a sound and the strength of the vibrations that produced it	
identifying differences, similarities or changes related to simple scientific ideas and processes	identify and describe the basic structure of a variety of common flowering plants, including trees		identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood		recognise that sounds get fainter as the distance from the sound source increases	
using straightforward scientific evidence to answer questions or to support their findings	observe and describe how seeds and bulbs grow into mature plants		recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function		Electricity (Yr 4, 6)	
planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary	find out and describe how plants need water, light and a suitable temperature to grow and stay healthy		describe the ways in which nutrients and water are transported within animals, including humans		identify common appliances that run on electricity	
taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate	identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers		Evolution and inheritance (Yr 6)		construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers	
recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs	explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant		recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago		identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery	
using test results to make predictions to set up further comparative and fair tests	investigate the way in which water is transported within plants		recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents		recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit	
reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations	explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal		identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution		recognise that some common conductors and insulators, and associate metals with being good conductors	
identifying scientific evidence that has been used to support or refute ideas or arguments					associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit	
					compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches	
					use recognised symbols when representing a simple circuit in a diagram	
					Forces and magnets (Yr 3)	
					compare how things move on different surfaces	
					notice that some forces need contact between two objects, but magnetic forces can act at a distance	
					observe how magnets attract or repel each other and attract some materials and not others	
					compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials	
					describe magnets as having two poles	
					predict whether two magnets will attract or repel each other, depending on which poles are facing	
					Forces (Yr 5)	
					explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object	
					identify the effects of air resistance, water resistance and friction, that act between moving surfaces	
					recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect	
					Seasonal changes (Yr 1)	
					observe changes across the four seasons	
					observe and describe weather associated with the seasons and how day length varies	
					Rocks (Yr 3)	
					compare and group together different kinds of rocks on the basis of their appearance and simple physical properties	
					describe in simple terms how fossils are formed when things that have lived are trapped within rock	
					recognise that soils are made from rocks and organic matter	
					Earth and space (Yr 5)	
					describe the movement of the Earth, and other planets, relative to the Sun in the solar system	
					describe the movement of the Moon relative to the Earth	
					describe the Sun, Earth and Moon as approximately spherical bodies	
					use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky	
					distinguish between an object and the material from which it is made	
					identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock	
					describe the simple physical properties of a variety of everyday materials	
					compare and group together a variety of everyday materials on the basis of their simple physical properties	
					Uses of everyday Materials (Yr 2)	
					identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses	
					find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching	
					States of matter (Yr 4)	
					compare and group materials together, according to whether they are solids, liquids or gases	
					observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C)	
					identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature	
					Properties and changes of materials (Yr 5)	
					compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets	
					know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution	
					use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating	
					give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic	
					demonstrate that dissolving, mixing and changes of state are reversible changes	
					explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda	

Key Stage 1		Lower Key Stage 2		Upper Key Stage 2	
Year 1	Year 2	Year 3	Year 4	Year 5	Year 6

Pupils should be taught to:

<u>Working scientifically (Yr 1&2, 3&4, 5&6)</u>	<u>Living things and their habitats (Yr 2, 4, 5, 6)</u>	<u>Animals, including humans (Yr 1-6)</u>	<u>Light (Yr 3,6)</u>	<u>Forces and magnets (Yr 3)</u>	<u>Everyday Materials (Yr 1)</u>
asking simple questions and recognising that they can be answered in different ways	explore and compare the differences between things that are living, dead, and things that have never been alive	identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals	recognise that they need light in order to see things and that dark is the absence of light	compare how things move on different surfaces	distinguish between an object and the material from which it is made
observing closely, using simple equipment		identify and name a variety of common animals that are carnivores, herbivores and omnivores	notice that light is reflected from surfaces	notice that some forces need contact between two objects, but magnetic forces can act at a distance	identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock
performing simple tests	identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other	describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets)	recognise that light from the sun can be dangerous and that there are ways to protect their eyes	observe how magnets attract or repel each other and attract some materials and not others	describe the simple physical properties of a variety of everyday materials
identifying and classifying		identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense	recognise that shadows are formed when the light from a light source is blocked by a solid object	compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials	compare and group together a variety of everyday materials on the basis of their simple physical properties
using their observations and ideas to suggest answers to questions	identify and name a variety of plants and animals in their habitats, including micro-habitats	notice that animals, including humans, have offspring which grow into adults	find patterns in the way that the size of shadows change	predict whether two magnets will attract or repel each other, depending on which poles are facing	<u>Uses of everyday Materials (Yr 2)</u>
gathering and recording data to help in answering questions	describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food	find out about and describe the basic needs of animals, including humans, for survival (water, food and air)	recognise that light appears to travel in straight lines	describe magnets as having two poles	identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses
asking relevant questions and using different types of scientific enquiries to answer them	recognise that living things can be grouped in a variety of ways	describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene	use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye	predict whether two magnets will attract or repel each other, depending on which poles are facing	find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching
setting up simple practical enquiries, comparative and fair tests	explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment	identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat	explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes	<u>Forces (Yr 5)</u>	<u>States of matter (Yr 4)</u>
