

Maths Evening – March 2014

Head Teacher, Mr Warren, “Thought this evening was really good; wish I had been taught maths in the same way way back when. The whole event was organised, I thought, really well and interestingly; it was very user friendly and if I had been a parent I would have been really pleased. The parents that were there looked engaged and happy, asking questions (all of which were answered superbly by the teachers in each classroom).”

Year 1

Multiplication
20 x 5 = 100
30 x 5 = 150
40 x 5 = 200
50 x 5 = 250
60 x 5 = 300
70 x 5 = 350
80 x 5 = 400
90 x 5 = 450
100 x 5 = 500

How many groups of 2 can you see?

How many spots of 0 tadpoles?

There are 10 sweets in each bag, how many sweets do we have altogether?

groups of

lots of

times

Words we should know

array

count

multiply

altogether

How many fingers are there on 2 hands?
